MAXIMUM M.O.I.

They say the Polarity MTRs have the highest MOI of any irons. The result? Straighter off-centre hits

Nicklaus Polarity MTR irons

www.nicklausgolf.co.uk

MOI might be the latest buzzword in drivers but Nicklaus have taken it to a whole new level with these Polarity MTR irons. They claim they deliver the highest MOI (Moment of Inertia) of any iron on the market. How? By distributing weight as evenly as possible from the toe right through to the hosel.

This gives maximum twist resistance and

makes it easier for us to hit straighter and longer shots on off-centre strikes. Clay Long, club designer at Nicklaus Golf, says, "We all know the importance of a great drive, but our customers are asking for equipment to help get to the green. Traditional weighting on irons is toe to heel. With our new irons, weighting has extreme distribution from the toe right to the hosel."

The Polarity MTRs also have a lower centre of gravity from their wide, cambered sole which gives higher ball flights plus progressive offset and sole widths. A standard set comes with 3-PW and a special Plus set has the new Claw Hybrids in place of 3 and 4-irons plus a sand wedge.

High MOI allows you to hit straighter and longer off-centre strikes

WELCOME BACK, CHAMP!

Wilson Staff 8876 Putter

01294 316270 www.wilsonstaff.com

One of the most recognisable putter designs in golf makes a welcome comeback in 2008. The classic half-mallet Wilson 8876 model is a close replica of their original TPA XVIII putter from around 20 years ago, made famous during Nick Faldo's stunning 1989 and 1990 Masters victories. This much-loved and collectable putter has inspired plenty of others since, including the Scotty Cameron Del Mar 3.5 and J.A.T. models plus the TaylorMade Rossa Maranello. Wilson's new version is constructed from anodised aluminium in a stylish non-glare gunmetal finish and has the same classic shape and three alignment lines of the original. However, when you add in the latest TPU urethane face insert technology for enhanced feel plus milled micro-groove face for more forward roll and less skid, you have a beautiful and effective package. The soft Winn AVS grip and snug magnetic headcover add a modern touch to this cracking retro putter.

With the 8876 Wilson have updated a classic.
