STAFF MODEL

IRONS

PLAYED BY GARY WOODLAND, BRENDAN STEELE
AND BENJAMIN HEBERT

PRECISION MILLED MUSCLE

Precision milled for precise, consistent weighting and feel from club to club.

FLUID FEEL HOSEL

Adapted from our classic Wilson Dyna-Powered irons, this design eliminates unnecessary weight in the hosel, allowing for a larger head and wider sole for increased playability.

OPTIMIZED SOLE CAMBER

A slightly more rounded front-to-back sole radius keeps the clubs out of the grass and on the ball for more consistent shots.

FOR HIGHLY SKILLED GOLFERS WHO REQUIRE PRECISION
AND SHOT-MAKING OPTIONS FROM THEIR IRONS.

IRONS

TRI-BRACE STABILIZER™

Our Tri-Brace Stabilizer in the cavity of the club head helps transfer more energy to the ball while delivering incredible sound and feel.

TUNGSTEN WEIGHTED DESIGN

Twenty grams of high-density tungsten in the toe of long and mid irons enhances head stability at impact and lowers the center of gravity, for reliably consistent shots.

FEEL & FORGIVENESS

A forged, 8620 carbon steel face is backed by an integrated impact mass area, providing solid, muscle back-like feel with cavity back consistency and forgiveness on all types of shots.

FOR GOLFERS WHO PREFER A PLAYER'S PROFILE
COMBINED WITH CAVITY-BACK FORGIVENESS.

STAFF MODEL

UTILITY IRONS

THE PERFECT
HYBRID ALTERNATIVE

HIGH-STRENGTH C300 FACE MATERIAL

A high-strength C300 face delivers greater ball speeds across the entire face so every shot goes farther.

SOLE WEIGHTING

Seven grams of weight are positioned low in the club head, making the utility irons forgiving and easy-to-hit with increased launch angles.

HOLLOW BODY LONG IRON SOLUTION

Distance, forgiveness and improved launch culminate in a very playable long iron, which has been refined to deliver optimized launch angles.

FOR GOLFERS WHO PREFER AN IRON PROFILE WITH
POWERFUL DISTANCE AND HIGHER LAUNCH ANGLES.

DRIVER

NEW

AVAILABLE IN WOMEN'S (PG 21)

PEAK KINETIC RESPONSE FACE

Every millimeter of the D9 driver face has been fine-tuned for explosive distance and performance. By dividing the face into a series of fractal zones, we've optimized forgiveness and ball speed.

[K]OMPOSITE CROWN

A three-layer crown of Kevlar® sandwiched between woven and unidirectional carbon fiber neutralizes vibration and is incredibly lightweight, which means a lower center of gravity for better ball flight.

OPTIMIZED WEIGHTING

Available in two weight configurations: a standard 10-gram or superlight 3-gram weight for increased MOI and added forgiveness.

AVAILABLE IN WOMEN'S (PG 21)

The Launch Pad driver is designed to solve golf's most common problem - the dreaded slice off the tee. The moderate hosel offset, with 13 grams of weight in the heel side of the club and an upright lie angle will put an end to the slice.

This innovative tech is built into the Launch Pad head and delivers high ball speeds and high launch angles, regardless of where on the face contact is made.

With a total club weight of just 272 grams, the Launch Pad driver is one of the lightest on the market, resulting in an effortless increase in club head speed for greater launch angles and distance.

STAFF MODEL

GOLF BALLS

EXPERIENCE PURE SPEED WITH STAFF MODEL

Staff Model is a true Tour-caliber, 4-piece urethane golf ball that delivers unmatched precision, speed and consistency. Since uneven paint can adversely affect performance, Staff Model is painted using a finely controlled application process that ensures every urethane ball leaves the factory with a nearly flawless finish. This means you can trust that Staff Model will always go where you need it to go. This is pure precision.

V-COR™ ADVANCED PERFORMANCE

A unique core composition magnifies energy to generate maximum velocity off the club face for greater distance performance.

4-LAYER SPIN & CONTROL

More layers. Higher spin. Better control. It's what the better players demand and it's what Staff Model delivers. Unmatched distance and shot-shaping off the tee. Tour-level workability on the fairways. Predictable stability on approach shots and exceptional control around the green.

3SIX2 SEAMLESS URETHANE COVER

Our seamless 362-dimple pattern smooths airflow around the ball for a lower ball trajectory and maximum distance performance.

NOTES

PERSONALIZE OPTION AVAILABLE

STAFF MODEL R

GOLF BALLS

SHINING A LIGHT ON INCONSISTENT BALL PERFORMANCE

Like Staff Model, Staff Model R is a Tour-caliber, 4-piece urethane golf ball that also delivers unmatched precision, speed and consistency. It's also the first golf ball to feature an unpainted urethane cover that delivers a lower flight trajectory, and "grabs" the wedge surface for enhanced greenside spin. This is the ball for players who demand the utmost in confidence and consistency. This is performance perfected.

WHAT YOU CAN'T SEE

CAN HURT YOU.

COMPETITOR

STAFF MODEL

STAFF MODEL R

UNEVEN PAINT CAN NEGATIVELY AFFECT BALL PERFORMANCE

As seen above, unevenly applied paint is visible under black light. This poorly applied paint creates heavy spots that may negatively impact ball performance, including flight trajectory and distance.

60 COMPRESSION

DUO Professional is the world's softest-feeling urethane golf ball. At 60-compression, the 3-piece construction provides distance as long or longer than any 3-piece urethane golf ball, providing exceptional spin and greenside control demanded by the best players.

DUO Professional offers a seamless 362-dimple pattern for enhanced distance and trajectory compared to any 3-piece ball on the market. The urethane cover provides exceptional scuff resistance and optimum greenside spin for optimal feel and control.
